PROJECT ONE (PART2)

GOAL
To create a Type Specimen for a web font using html, and in doing so gain understanding of web fonts and CSS positioning and CSS grid.

SKILLS
• Demonstrate understanding of web fonts vs print
• Demonstrate ability code out a static design using HTML and CSS
• Demonstrate ability to add web fonts from typekit or google font.
• Demonstrate understanding of grid structure in web design.

REQUIREMENTS:
(PART 2)
Starting with your initial design you can sketch out wire-frames to help you translate your design to HTML. Feel free to make adjustments or changes to your initial design once you start your code.
• Create an index.html file with your type specimen content.
• Add web font, use google font or typekit.
• Create a CSS file to style and position your type specimen.

IMPORTANT!!!
If you are using typekit remember to add http://www.laurahuisinga-design.com to your typekit and re-publish.

DELIVERABLES
(PART 2
Final product will be a folder with one index.html file and one style.css file turned in on google classroom. Have your files completed and bring to class for Final Critique. You will have time to edit, add to or fix your code after the critique before turning in the final graded code.

Final Critique: 2/21
DUE: Monday 2/26
